

Client Duty	Edmont Support
The Client must check that any designer or contractor you are appointing has the necessary skills, knowledge and experience to carry out the work in a way that ensures health and safety.	Edmont will undertake a review of the design team and tendering contractor's competence against the standards set out within the 2015 regulations and report the findings back to the Client.
Provide Pre-Construction Information to every designer and contractor appointed or being considered for appointment.	Edmont will identify, collate and disseminate the Pre-Construction Information at relevant project stages.
Make suitable arrangements for managing a project including the allocation of sufficient time and resource. Ensure that the arrangements are maintained and reviewed throughout the project.	Edmont will advise as to suitable arrangements for managing health & safety on a project. Edmont will monitor and review these arrangements throughout the project lifecycle.
Ensure that the contractor has the prescribed welfare facilities in place before work starts.	Edmont will agree suitable arrangements with the contractor on behalf of the client and also visit site to ensure welfare facilities prescribed are installed as agreed.
Give Notice to the Health & Safety Executive via Form F10.	Edmont will issue an F10 notification to the HSE on the Clients behalf.
Where more than one contractor will be involved, appoint a Principal Designer. Ensure that the Principal Designer complies with their duties.	Edmont will undertake a review of the Principal Designers competence and provide advice on when the Principal Designer should be appointed. Edmont can attend periodic design team meetings and review the Principal Designers audit trail to ensure they are carrying out their duties under the CDM Regulations.
Where more than one contractor will be involved, appoint a Principal Contractor. Ensure that the Principal Contractor complies with their duties.	Edmont will advise the Client on the requirement to appoint a competent Principal Contractor. Edmont will ensure the Principal Contractor complies with their duties through on-going dialogue, site visits & auditing where necessary.
Ensure that before the construction phase begins a suitable construction phase plan is drawn up by the contractor or Principal Contractor.	Edmont will ensure that the Principal Contractor produces a Construction Phase Plan that fully takes into account all relevant Pre-Construction Information. Edmont will ensure that the plan is suitable for managing health and safety for the project and its surroundings.
Ensure that a Health & Safety File is prepared for the project.	Edmont will ensure that the Principal Contactor produces a Health & Safety file in accordance with the Clients desired format on completion.
